

REVERSE OSMOSIS SYSTEM 25 LPH FOR FOOD SERVICE APPLICATION

GET THE TASTE OF REAL WATER

Pentair introduces the finest Commercial Reverse Osmosis System. This 5 stage RO System from Pentair is specially designed to offer optimum level of water filtration, It filters particles as small as .0001 micron.

With advanced technology and reliable quality, Pentair uses world class components in this RO System, to ensure safe drinking water for all. Our high technology membrane and filters help remove all impurities like mineral salts (TDS), suspended particles (TSS) etc found in water and makes the tap water safe for consumption.

UNIQUE FEATURES

Pentair Commercial RO purifier is the best in its class, having the advantages of Pentair's advanced technology.

- **Sediment Cartridge pre filter** - Helps in removing all suspended impurities
- **Granular Activated Carbon Filter** - Makes water drinkable by removing color, organic, chlorine, odor
- **Carbon Block Filter** - Removes chlorine, odor, taste and color
- **HRO membranes** - These are high flow Pentair membranes, remove water contaminants such as dissolved salts, pesticides & heavy metals etc.
- **Post membrane** - The post membrane polishes the water to improve the taste of the water and makes it drinkable.
- **Auto Flushing** - Auto flushing increases the life of membranes.

BENEFITS

- World class components used to ensure pure water.
- Significantly less expensive than bottled water, with a reduced impact on environments.
- Enhances taste by removing undesirable salts and minerals.
- RO Membrane removes up to 99% of dissolved solids.
- High-capacity filters that reduce bad taste/odor and chlorine.

As a world leader in water filtration, our sales representatives and service technicians are familiar with local water conditions in your area. Being both global and local, we deliver customized solutions to commercial and industrial water needs, that elevate your business and your bottom line.

TECHNICAL SPECIFICATIONS

Product	Reverse Osmosis System
Applications	Suitable for purification to tap water upto TDS-2000 ppm and hardness below 500ppm
Purification Capacity	Up to 25 L/hr**
Type	Wall Mounted / Under Sink
Dimension (mm)	L 411 x 180 x 500
Stages	Sediment, GAC Cartridge, Carbon Block Cartridge, RO and Post- Carbon
Auto-Flushing	Yes
Booster Pump	150 GPD, 24 VDC
Main Voltage	230 VAC AT 50 Hz
Recovery	Up to 25%
Rejection	90-95%

**As per standard test conditions. 10 psi input pressure and 250ppm TDS AT 25° C.
